

# Qualification

## Configurable Single-use Systems

### Benefits

- Compliance with regulatory requirements (GLP | GMP)
- Strict Sartorius test standards
- Comprehensive documentation; easy to integrate into your existing quality management system

### Product Information

Sartorius SAT (Site Acceptance Testing) is your guarantee for GLP- | GMP-compliant operation of your system. Our trained specialists are perfectly prepared to perform all necessary tests to ensure successful on-site equipment qualification. Our comprehensive and customer-specific documentation can be easily integrated into your existing quality management systems.

#### Specifications

- On-site qualification (SAT) will be performed by one of our qualified service technicians and, if required, qualification tests will be documented:
  - Verification of product and test specifications
  - Test plan and report
  - Inspection of re-piping
  - Testing re-I | O

#### The qualification is available for the following single-use systems:

- FlexAct® Systems for the following:
  - Preparation of buffers and media
  - Cell harvest | Depth filtration | DBF (clarification by body feed filtration)
  - Virus inactivation (pH reduction)
  - Virus filtration
  - Ultrafiltration | Diafiltration

## Customer Prerequisites

- All equipment is already at the site where SAT will be performed
- Sufficient space for access to the equipment is available
- Power supply and supply (feed) lines are available at the place of installation
- A helper must be available to assist with lifting and carrying the equipment. The customer provides lifting devices (eg.: fork lift)
- The customer must designate the person responsible at the customer's site when placing an order
