

Preventative Maintenance

Sterile dis- | connectors

Benefits

- Consistently robust and valid connection¹ and welding of thermoplastic tubes
- Optimized equipment performance
- Trouble-free operation; reduction of downtime
- Compliance of regulatory requirements

¹ only for BioWelder®

Product Information

Precision systems require regular professional maintenance in order to deliver the desired results over the long term. We recommend that you sign a maintenance agreement so that you can fully rely on your equipment and ensure maximum productivity.

Specifications

- Visual inspection of equipment for signs of any damage
- Function testing of system components
- Performance verification of the system
- Equipment test run
- Exchange of parts subject to wear
- Written maintenance report provided
- Software updates

The preventative maintenance is available for the following sterile dis- | connectors:

- BioWelder®
- BioWelder® TC
- BioSealer®

Note

When you purchase the „Preventative Maintenance“ repairs, original spare parts, travel expenses and per diem (daily allowances) are not included in the scope of the services and are invoiced extra. Our service contracts cover these costs partly or fully depending on the contract level.

If you are interested, please get in touch with us. In addition to our individual services, we also offer complete service package contracts. You will find all important information on our website at www.sartorius.com/service.
