# Have you ever thought about Freezing?

The Celsius® S<sup>3</sup> Benchtop system is the only laboratory instrument available on the market to evaluate the Freeze and Thaw processes of new drug candidates in single-use containers with full scalability to production scale (Celsius® FT system).

This tool allows generation of consistent samples library useful for evaluating stability, storage conditions and formulations.

Samples frozen in the Celsius® S<sup>3</sup> Benchtop system may be stored at different temperatures to investigate the drug substance stability, using final scale-like conditions.

# Celsius® S<sup>3</sup>: Scale-down and Stability Studies

Celsius®  
CFT

The ability to mimic with few millimeters the final production scale, the Celsius® FT system, making Celsius® Controlled Freeze and Thaw (Celsius® CFT), an unique platform fully scalable from lab to production scale.
